## Warranty

### **Double Seal, 10 Year Guaranty**

CVG does hereby warrant that for a period of Ten (10) years from the date of manufacture, under normal conditions, that material obstruction of vision resulting from dust collection or film formation on the interior surface of our insulating glass will not occur. Glass breakage of any kind or scratches by others is not covered by the Warranty. **Labor costs** of any kind are not covered by the Warranty.

This product Warranty applies only if the insulating glass unit is installed in accordance with I.G.M.A. installation instructions and does not apply to insulating glass that is damaged by careless handling or improper installation practices.

Replacement insulating glass covered by this Warranty will be replaced by delivery only to the nearest F.O.B. shipping point in Canada of the original place of sale. CVG may, at their option, refund the original purchase price of the insulating glass rather than supply a replacement.

The Warranty does not apply to replacement units beyond the original Ten (10) year period applying to the original unit.

The Warranty does not apply to any insulating glass installed in watercraft, land vehicles, trailers, solar collectors, commercial refrigeration units, or in close proximity to areas with Excess Humidity: i.e. swimming pools, hot tubs, etc. Coating or films applied to the glass by others will void this Warranty.

The Warranty will not apply to any units used on a wall sloped more than 15 degrees off vertical unless manufactured using silicone seal and the glazing system must completely repel water.

CVG Glass will have no obligation or Liability under the preceding Warranty until payment in full is received from the Purchaser & the account is in good standing.

No distributor of CVG, no representative or employee of CVG other than an officer of Central Valley Glass has the authority to make any warranty; express or implied that is binding on CVG or to alter or to change the Warranty.
